DELHI

Delhi is the Capital City of our Country. On 25th November 2019 Delhi become A mix of factors like vehicular and industrial emissions, dust and weather patterns make Delhi the world's most polluted Capital. The air turns especially toxic in winter months as farmers in neighbouring states burn crop stubble. And fireworks during the festival of Diwali, which happens at the same time, only worsen the air quality. Low wind speed also plays a part as it traps the pollutants in the lower atmosphere. The morning skies take on an ominous grey colour, we complain of stuffy nose and itchy eyes, and hospitals start to fill up with people complaining of wheezing and breathing difficulties. The mere act of breathing in Delhi becomes hazardous. As a part of it, our College Students' Union conducted a campaign to protect Delhi from being polluted.
